                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     282
further be used for recombinant expression of their encoded polypeptides, as immunogens in the preparation or screening of antibodies, and in sense or antisense suppression of genes in a host cell, tissue or plant. The proteins may be used in assays for enzyme agonists or antagonists, as immunogens or antigens to obtain antibodies specifically immunoreactive with the proteins. The present sequence represents a cDNA encoding a signal transduction protein of the invention

The nucleic acids are useful for regulating expression of phytohormones, including ethylene, auxins, cytokinins, and gibberellin, to effect developmental changes in plants and provide control of plant response to environmental stresses. They may also be used as probes or amplification primers in the detection, quantitation or isolation of gene transcripts, for detecting mutations in the gene, for monitoring upregulation of expression or changes in enzyme activity in screening assays of compounds, for detection of any number of allelic variants, or for site-directed mutagenesis in eukaryotic cells. They may further be used for recombinant expression of their encoded polypeptides, as immunogens in the preparation or screening of antibodies, and in sense

```
The invention relates to identifying a stress condition to which a plant cell has been exposed, comprising: (a) contacting nucleic acid are representative of expressed polymucleotides in the plant cell with an array or probes representative of the plant cell genome; and (b) detecting a profile of expressed polymucleotides in the plant cell characteristic of a stress response. The method is useful in the production of transgenic plants. Cells and seeds and in producing plants with increased tolerance to abiotic stress. The present sequence is that of an Arabidopsis thalians stress regulated gene (ABZ12196-ABZ17574) used not represented in the printed specification but is based on sequence information supplied to Derwent by the European Patent Office
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          211
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    215
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              96 carricacia artrecesce acteriras centes estas certas artres estas artres estas 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             condition to which a plant cell has been exposed and

The invention describes a recombinant DNA construct comprising a polynucleotide consisting of a sequence encoding an amino acid sequence available in electronic form from the US patent office at try. seqdata.uspto.gov/sequence.html?DocID:2004034888. The polynucleotide of the invention are also useful in physical arrays of molecules and as plant breeding markers. The recombinant DNA construct is useful for improving plant tolerance to cold, heat, drought, heaticides, extreme cancer conditions, pathogens or pests, for manipulating growth rate in plant cells by modification of the cell cycle pathway, for conferring increased resistance to plant disease, for producing galactomannan, increased resistance to plant disease, for producing galactomannan, inginin or plant growth regulators, for increasing the rate of homologous recombination in plants, for improving yield by modification of photosynthesis or carbohydrate, nitrogen or phosphorus use and/or uptake or by providing improved plant growth and development under at least one treas condition or for modifying seed oil or protein yield and/or content. This sequence represents a plant full length insert of the information in the recombinant DNA construct of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  81 GACGGGGGGCGGTGGCGGAGTTCAGGCCGACGATGACGCACGGCGGCCGGTACCTGCTC 140

The invention describes a recombinant DNA construct comprising a polynucleotide consisting of a sequence encoding an amino acid sequence available in electronic form from the US patent office at available in electronic form from the US patent office at the polynucleotide of the inspection are also useful in physical arrays of molecules and as plant breeding markers. The recombinant DNA construct is useful for improving plant tolerance to cold, heat, drought, herbicides, extreme cosmotic conditions, pathogens or pests, for manipulating growth rate in plant cells by modification of the cell cycle pathway, for conferring increased resistance to plant disease, for producing galactomannan, ignin or plant growth regulators, for increasing the rate of homologous recombination in plants, for improving yield by modification of photosynthesis or carbohydrate, introgen or phosphorus use and/or uptake or by providing improved plant growth and development under at least one structure. This sequence represents a plant full length insert content. This sequence represents a plant full length insert of the plant can be used in the recombinant DNA construct of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö

                                                This cDNA encodes a salicylic acid induced protein (SIP) kinase. This SIP kinase is an unique member of the mitogen-activated protein (MAP) kinase family. The salicylic acid induced MAP kinase of the invention comprises kinase subdomains I to XI of serine/Lhreonine kinases. The protein is activated by an agent that induces a disease defence response in plants by way of a signal transduction pathway that is at least partially dependent on salicylic acid. Host plant cells transformed with a vector containing a recombinant DNA molecule encoding the salicylic acid induced MAP kinase is used to produce the protein recombinantly. The products can he used to produce with increased disease resistance. The products may also be used as a research tool to identify other proteins involved in the hypersensitive response and systemic acquired response in plants

The invention provides Zea mays signal transduction proteins and encoding nucleotide sequences. The nucleic acids are useful for regulating expression of phytohormones, including ethylene, auxins, cytokinins, and gibberellin, to effect developmental changes in plants and provide control of plant response to environmental stresses. They may also be used as probes or amplification primers in the detection, quantitation or isolation of gene transcripts, for detection mutations in the gene, for monitoring upregulation of expression or changes in enzyme activity in screening assays of compounds, for detection of any number of allelic variants, or for site-directed mutagenesis in eukaryotic cells. They may further be used for recombinant expression of their encoded polypeptides, as immunogens in the preparation or screening of antibodies, and in sense

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 1, Application US/09623034

Patent No. 6765128

GENERAL INFORMATION:

APPLICANT: Klessig, Daniel F.

APPLICANT: Klessig, Daniel F.

TITLE OF INVENTION: METHODS OF USING A PATHOGEN-ACTIVATABLE

TITLE OF INVENTION: MAP KINASE TO ENHANCE DISEASE RESISTANCE IN PLANTS

TITLE OF INVENTION: MAP KINASE TO ENHANCE DISEASE RESISTANCE IN PLANTS

FILE REPERRECE: RUT98-0073

CURRENT APPLICATION NUMBER: DCT/US99/03882

PRIOR FILING DATE: 1999-02-23

PRIOR PLING DATE: 1999-02-24

PRIOR FILING DATE: 1999-02-24

NUMBER OF SEQ ID NOS: 2

SOFTWARE: FREESE FOR Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            143
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 260
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 GGAGGICAATICCCTGATITICCTTCGGTTTTAACTCACGGCGGACAATATGTACAGTTT 200

Sequence 38, Application US/09417197

Patent No. 6518021

GENERAL INFORMATION:

APPLICANT: Old THASTRUP, et al.

TITLE OF INVENTION: On A Cellular Response

FILE REFERENCE: 3759-0110P

CURRENT APPLICATION UNDER: US/09/417,197

CURRENT FILING DATE: 1999-10-07

NUMBER OF SEQ ID NOS: 143

SOSTWARE: PATENT OF VERSION 3.0
